### (54) ANTICRIME DOUBLE DOOR

#### (57)Abstract:

PROBLEM TO BE SOLVED: To make it possible to open a double door as a unit as same as a single door when the whole door is opened without exceeding an occupied space even if it is the double door and to also facilitate the opening and closing of a kev.

SOLUTION: An anticrime double door 1 is equipped with an inside door 3 openable as a unit together with an outside door 2. Two operation bars 18 and 19 connected to a key-hole of the outsidedoor 2 and projected from the inside surface are inserted into operation bar holders provided to the inside door in a detachable manner. By the constitution, when both doors are closed, an outside dead bolt and a dead bolt 23 can be opened with a key or thumb turns 16 and 17. Since a door knob 12 is projected from an opening section 6 of the outside door 2, it can be used when the inside and outside doors are opened as a unit. The inside door 3 is simulatneously turned with the outside door 2 by interlocking a hooked bolt proved to the outside door 2 with a locking metal fixture 24 provided to the inside door 3.

## (54)【発明の名称】 防御用二館ドア

### (57)【要約】

【課題】 二重ドアであっても占有スペースが過大にな ちず全体関放時には1枚ドアと同様に一体となって開放 でき錠の関閉操作も容易にする。

【解決手段】 防犯用二重ドア1は、外側ドア2と一体になって開放し得る内側ドア3を備える。外側ドア2の鍵孔に接続して内面より突出する2本の作動棒18,19は、内側ドアに設ける作動棒受に基々離脱可能に挿着する。これにより両ドア閉鎖時に鍵もしくはサムターン16.17で外側デットボルト及び内側デットボルト23を開けることができる。ドアノブ12は外側ドア2の関口部6より突出するので内外ドアー体で開放する際に使用できる。外側ドア2に設ける鉤付ボルトと内側ドア3に設ける掛止金具24の係合により内側ドア3は外側ドア2と同時に回動する。
